PostalOne!®
Release 39.1.1.1

The PostalOne! system Release 39.1.1.1 is to introduce software fixes to the system. This includes a correction to issues previously identified in a prior release.

These Release Notes provide the contents of the release and affected subsystems.

Table of Contents

1. All Users

PostalOne! Release 39.1.1.1 is scheduled to deploy on January 8, 2015 to introduce software fixes to the system. This includes corrections to issues previously identified from a previous release.

1.1 Full-Service MicroStrategy Reports

The MicroStrategy Mailer Scorecard now displays complete Mailer Profile data for postage statements submitted manually or through the Postal Wizard prior to December 22, 2014. Prior to that date, the Customer Registration ID (CRID) of the eDoc submitter was not consistently available in the MicroStrategy reporting database. As a result, mail volume and revenue data for manual and Postal Wizard statements was not always included on the Mailer Scorecard for date ranges from November 2013 through December 2014. 6021 (13206-R) E&I

1.2 eVS

1.2.1 Payment Status Extracts

The eVS Payment Status Extract generator has been updated to allow Payment Status Extract files to be generated for manifest files that are still in processing at the time the extract runs. Prior to this release, the Payment Status Extract generator did not account for manifest files that were still being processed at runtime, and therefore no Payment Status Extract files were generated for those manifest files. As a result, mailers did not receive all the eVS Payment Status Extracts that they should have. 6046 E&I
